

Small size power electromagnetic relays with magnetic blow. Relay can operate without any disruption thanks to direct magnetic pole on electric arc between NO contacts.

- Power electromagnetic relay dedicated for DC application.
- Distance between contacts: 3 mm (version 2Z); 6 mm (version 1Z) AC and DC coils
- Mounting: inplug-in sockets; on DIN rail acc. PN-EN 60715; on plate
- Version: Faston 187 (4,8 x 0,5 mm)
- Additional feature: L – light indication (LED diode)
- Application: heatingPrzekaźniki ogólnego zastosowania, zalecane szczególnie do łączenia obciążeń stałoprądowych (DC), cooling and ventilation systems, air-conditioning; control for 1 or 3 phases motors; food industries machines; industrial automatic application; other
- RUC-M power relay with magnetic blow Small size power electromagnetic relays with magnetic blow. Relay can operate without any disruption thanks to direct magnetic pole on electric arc between NO contacts.
